PASCOM®

We upgrade business communications.

WE'RE HIRING

JOIN THE PASCOM TEAM AS A PYTHON DEVELOPER

Our development team is looking for a skilled developer to work on our ERP Odoo backend written in Python. As part of our development team, you will have the opportunity to grow your knowledge of real-time communication platforms (i.e., Asterisk, Kamailio, Janus and WebRTC). Our cloud stack platform covers everything from our mobile and desktop apps right through to our server farm which provides the "always-on" backend to enable real-time communication.

Technical experience and skills

- Previous experience with Python is key requirement, but experience with ORM frameworks (Odoo, Django…) is desirable, not necessary.
- You will need GIT versioning system experience.
- The job description also includes designing and creating REST APIs.
- We use Jira ticketing system and Confluence workspace.

You know you're the right fit when

- You put quality and knowledge first
- You are a learning-driven person
- You are crazy about the latest cutting-edge tech, and you are not technology-specific
- You want to understand the business context and logic behind the software solution
- You are not afraid to try something new and find new ways to improve your work
- You are a good team player

What makes life at pascom fun and exciting

- Working with all the latest in real-time communication technologies
- Working on an actual product that lives and grows
- Working with a highly experienced international team of IT experts
- No contact with the clients (development is our main concern)
- No overtime, short deadlines and unbearable pressure
- Different types of paid bonuses
- Work from home options
- Further your education through company-sponsored qualifications, courses, and seminars
- Access to a large knowledge base and digital library of professional books
- Exciting trips to various company offices
- Delicious lunches every day with the team
