

WE'RE HIRING

Become part of our team in any of our
Deggendorf, Regensburg or Niš offices

We are looking for talented DevOps engineers to join our team!

We are always on the lookout for talented DevOp engineers who are passionate about cutting-edge Cloud Business Communications solutions. So if you know your Backend from your Frontend, have skills with AWS, APIs and Cloud Technologies, know your way around database technologies, LXC containers, Consul, Packer and Vault and have a hunger to continually learn new technologies to grow and improve our VoIP platforms, then apply today to join our dynamic international team of likeminded developers and let your passion, ideas and skills shine.

To manage our IT infrastructure, you need to be:

- Experienced with AWS (EC2, VPC, ELB, Lambda, CloudFormation ...)
- Able to work with serverless framework
- Familiar with Jenkins (pipeline)
- Able to write scripts in python, shell/bash for Linux OS
- Comfortable using Git....
- ... Dedicated to achieving both our technical and business aims.

It would be great if:

- You are AWS Certified (e.g. Solutions Architect – Associate)
- You have experience with cloud infrastructure technologies (LXC/LXD, Linux...)
- You know your way around Docker.
- You've used Jira ticketing systems.
- You experience with networking infrastructures...
- ... You learn from mistakes and have a driving desire to improve performance.

And you will be a perfect fit if:

- You've worked with Consul before
- You know how to use Packer
- You are familiar with using crypto tools like Vault
- You used VMware before
- You have a sound knowledge of PostgreSQL...
- ...You constantly strive for perfection and new possibilities excite you.

APPLY TODAY

for roles at our German headquarters or our branch office in Serbia.
