

# WE'RE HIRING

Become part of our team in any of our  
Deggendorf, Regensburg or Niš offices

## We are looking ambitious Quality Assurance Testers with a technical background to join our team!

We are always searching for lateral thinkers with a focus on VoIP, open-source software and web technologies. We are looking for someone who is able dive right into and balance different tasks equally when working on our Business Communications platform together with our international team.

This position will offer the ideal candidate a great opportunity to work. Whether you have prior experience or not, the opportunity to join our team will be a great addition to your list of career accomplishments.

### You will be best suited if:

- You have basic knowledge of TestRail (or you are familiar with any other Quality Assurance tools).
- You have a basic knowledge of API testing.
- You know how to test desktop, mobile and web apps.
- You know how to use Git or other version control systems.
- You know your way around Asterisk...

... Noticing even the smallest detail is important to you because only the best is good enough.

### More handy skills:

- Understanding of Bash shell scripts.
- Basic knowledge of Linux OS.
- Basic knowledge of automation testing.
- General networking knowledge.
- Administration skills...

... The ability to clearly convey QA issues to developers, because you will spend a good part of your day talking with them.

### And you will be totally awesome if:

- You've used Jira before or any other ticketing system.
- You understand the SIP protocol.
- You know how VoIP Provisioning works.
- You have a basic knowledge of virtualization (VMware, Hyper-V or equivalent) ...

... You always have a positive attitude no matter what challenges you face.

**APPLY TODAY**

**for roles at our German headquarters or our branch office in Serbia.**
